QRyde

Simplifying Transportation. Energizing Communities.

The QRyde Community Solution

QRyde provides the tools and resources required for any community to build and run its own transportation system - with or without external or government funding.

Our approach is unique. We believe in the importance of partnerships between transportation providers and the communities they serve, whether that community is small or large, physical or virtual, wealthy or economically disadvantaged.

Because of that belief, QRyde applies its years of transportation software and operations experience to solve the trickiest problems out there. Our technology, our transportation champions, our training tools, our core transportation partners, and our expertise, all combine to create one powerful approach to solving the world's - and your - transportation problems.

The QRyde Toolkit

QRyde has a full suite of award-winning technology tools to allow any community, large or small, to run a transportation network.

QRyde Technology

From online consumer booking, to smartphone apps for ride discovery, tracking and booking; from simple-to-use 'trip boards' where transportation providers can find, accept and manage all of their work, to downloadable and printable passenger manifest; from more robust call-taking and dispatching tools for bigger players, to fully customized reporting suites... Our industry-leading, patent-pending system and technology is poised to revolutionize the way transportation is delivered.

QRyde Transportation Champions

Every community needs a champion to make sure all of its citizens are being served in the ways that benefits them the most. QRyde Transportation Champions do just that. Working with our technology, local and national transportation providers, and a huge experience set, QTCs will work with community experts to create a dynamic, sustainable, flexible transportation system for any community.

Our Transportation Champions also transfer their vast knowledge to the communities themselves, so each community can grow at its own pace, and achieve the success the want and deserve.

QRyde Core Transportation Partners

QRyde has partnered with a number of transportation providers who have a national footprint, either directly or through extended relationships. This means when a community is ready to join QRyde, they will automatically have access to transportation, and its citizens will be able to request rides almost immediately!

The Core transportation Providers are only part of the puzzle. Our QRyde Transportation Champions will seek out and partner with additional providers in each community to expand and deepen the availability of transportation to as many people as possible.

Join QRyde Today!

Visit www.qryde.com to find out how you can become a QRyde Community or QRyde Transportation Provider!

QRyde

"Simplying Transportation. Energizing your Community."

Veterans

Military veterans have a unique place in our society, and understand better than most the value of supporting one another. With QRyde, vets can start their own transportation network, or join the QRyde National Veterans' Transportation Network.

It's time to... rethink veterans transportation.

Volunteers

Volunteers are a key component to great transportation. With a robust Volunteer program:

- Community members can find convenient and inexpensive rides
- Volunteers can be rewarded for their time
- Agencies can connect to their riders more easily, and find new riders to serve
- Agencies can serve members with local-mile rides.

It's time to... add volunteer transportation to your community
